Title
Demo account form - mobile

Charter
Same URL: [https://revolgy-forms-case-study-master.staging.axiory.com/jp/registration/demo|https://revolgy-forms-case-study-master.staging.axiory.com/jp/registration/demo] For mobile I will be testing in the desktop browser in mobile device emulator mode. I've selected *iPhone 12 Pro* device profile. Exploratory testing is time-boxed for 15 minutes
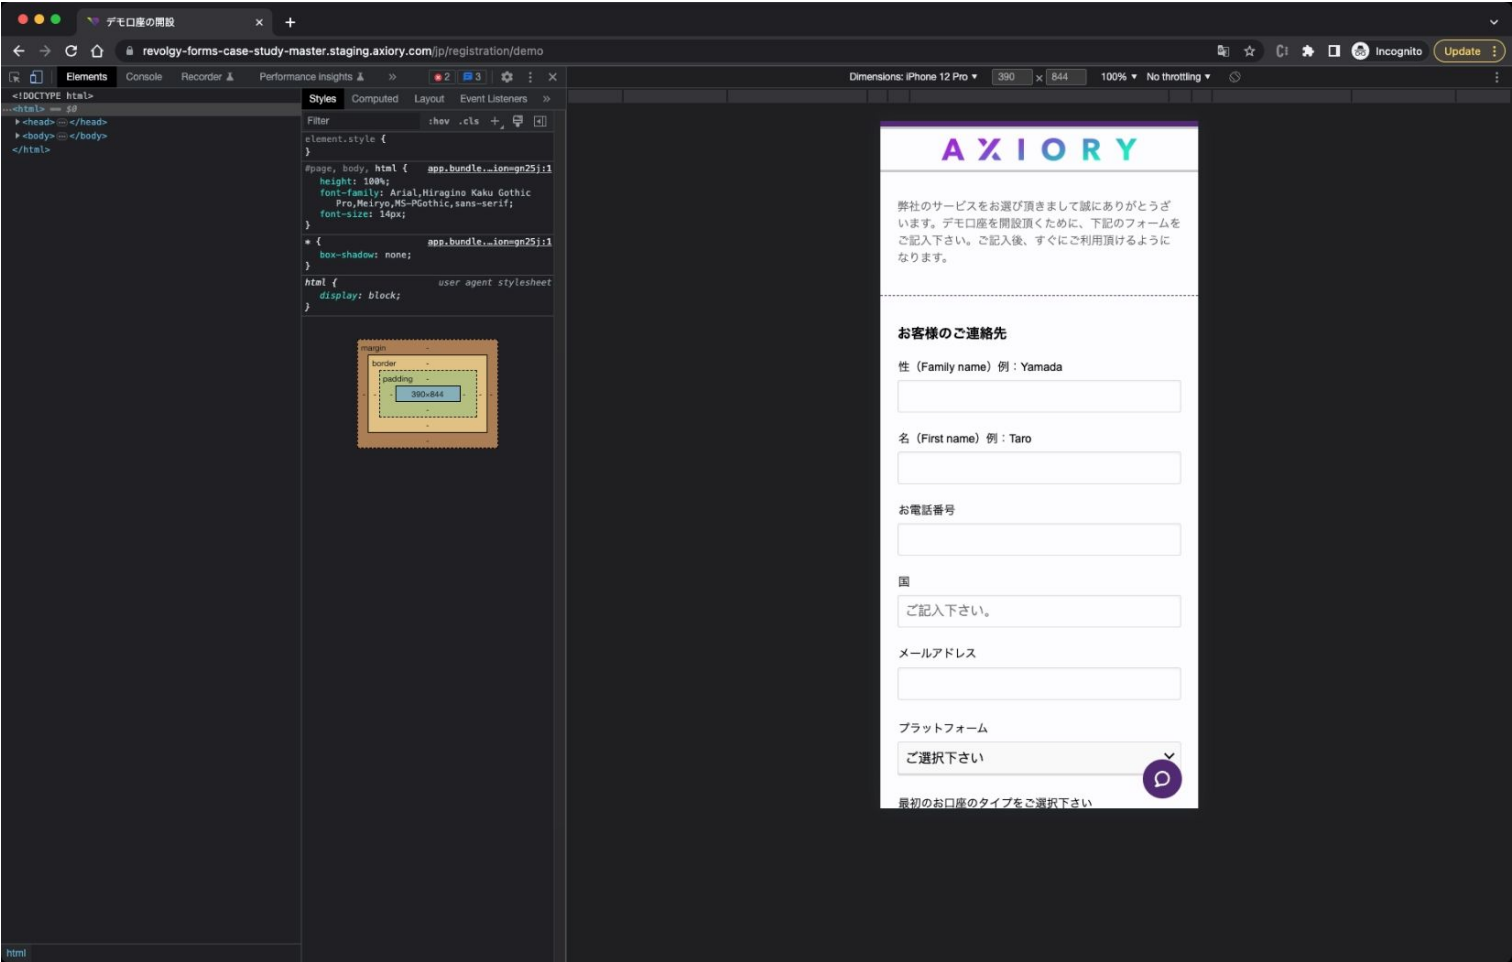

Preconditions
No preconditions defined

▶ **Session started · Duration 00:16:14 11h24 | 06-03-2023**

📷 **00:00:28 | Screenshot · Comment**

New incognito windows with iPhone 12 Pro device simulation is prepared

📷 **00:01:06 | Screenshot · Comment**

Application under the test is opened

00:02:12 | Note · Comment

I try not to use desktop related inputs (like scrolling by mouse middle wheel) but I try to simulate all actions only by "touching the screen".
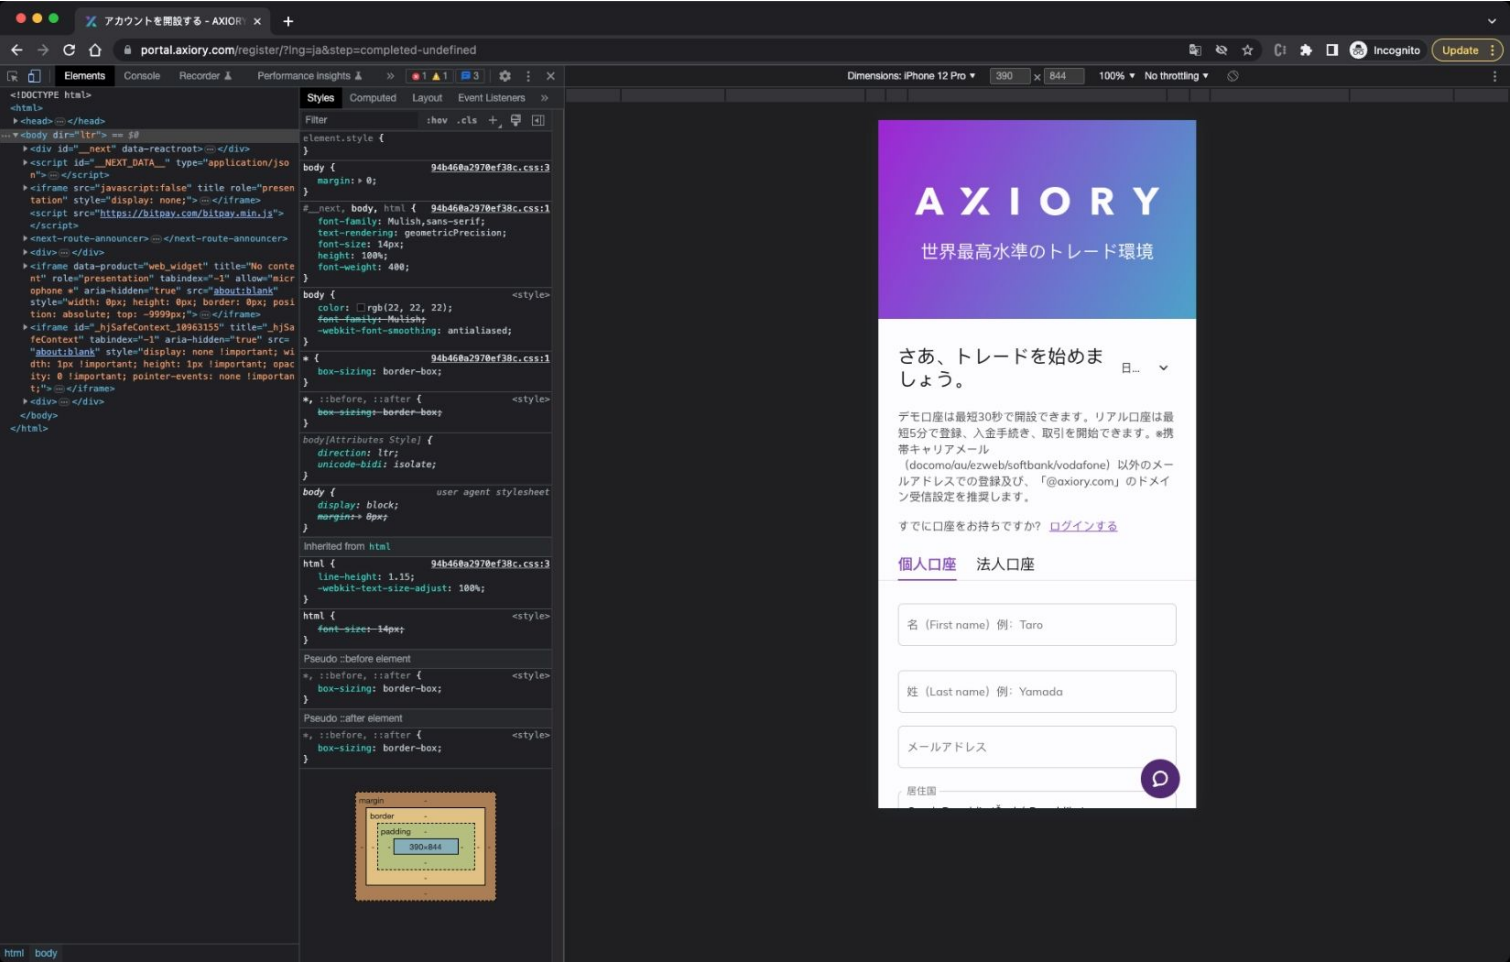

00:03:13 | Note · Problem

Sending empty form is not possible. The "hidden mandatory" items are required.

00:05:24 | Screenshot · Comment

The list of all mandatory items is same as on desktop version.

00:06:37 | Note · Idea

I would check the international format for the phone field. Currently there is no limitation for the phone field.

00:07:18 | Note · Comment

Now let's try to provide some value into all possible form fields.

00:09:23 | UserFile · Problem

Screenshot 2023-03-06 at 11.32.22.png

If I tap "platform" select input field the design seems to be broken. The dropdown menu with options is shown too small and on wrong place.
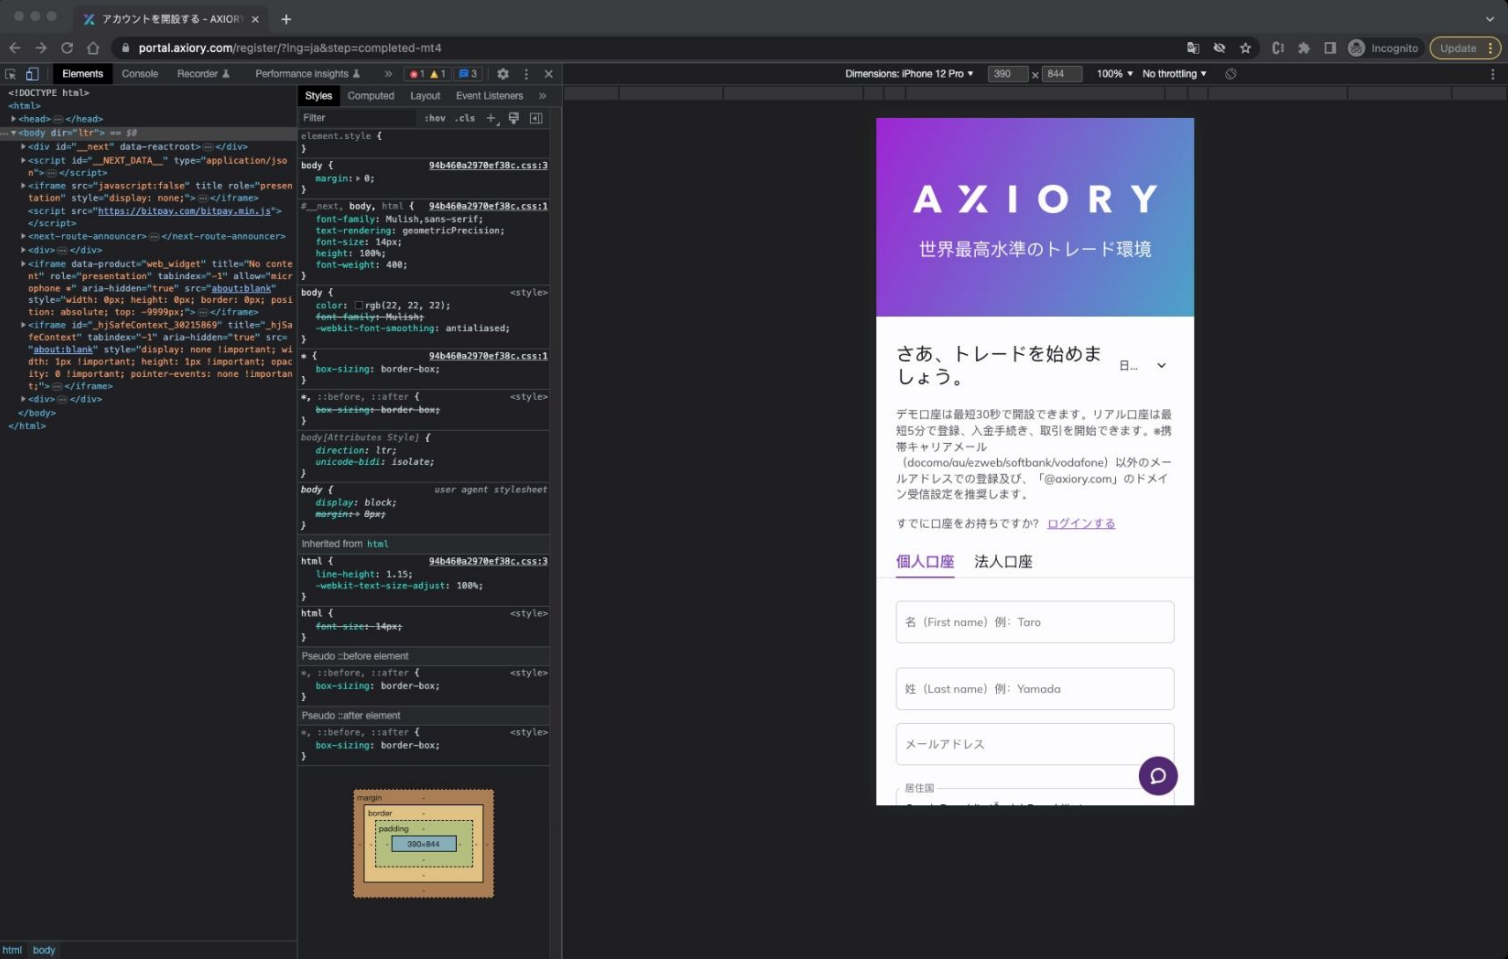

00:10:40 | UserFile · Problem

Screenshot 2023-03-06 at 11.33.56.png

Same problem with wrong placement occurs for all four select input fields.

00:12:31 | Screenshot・Comment

If I provide values to all possible form items the form seems to be accepted.
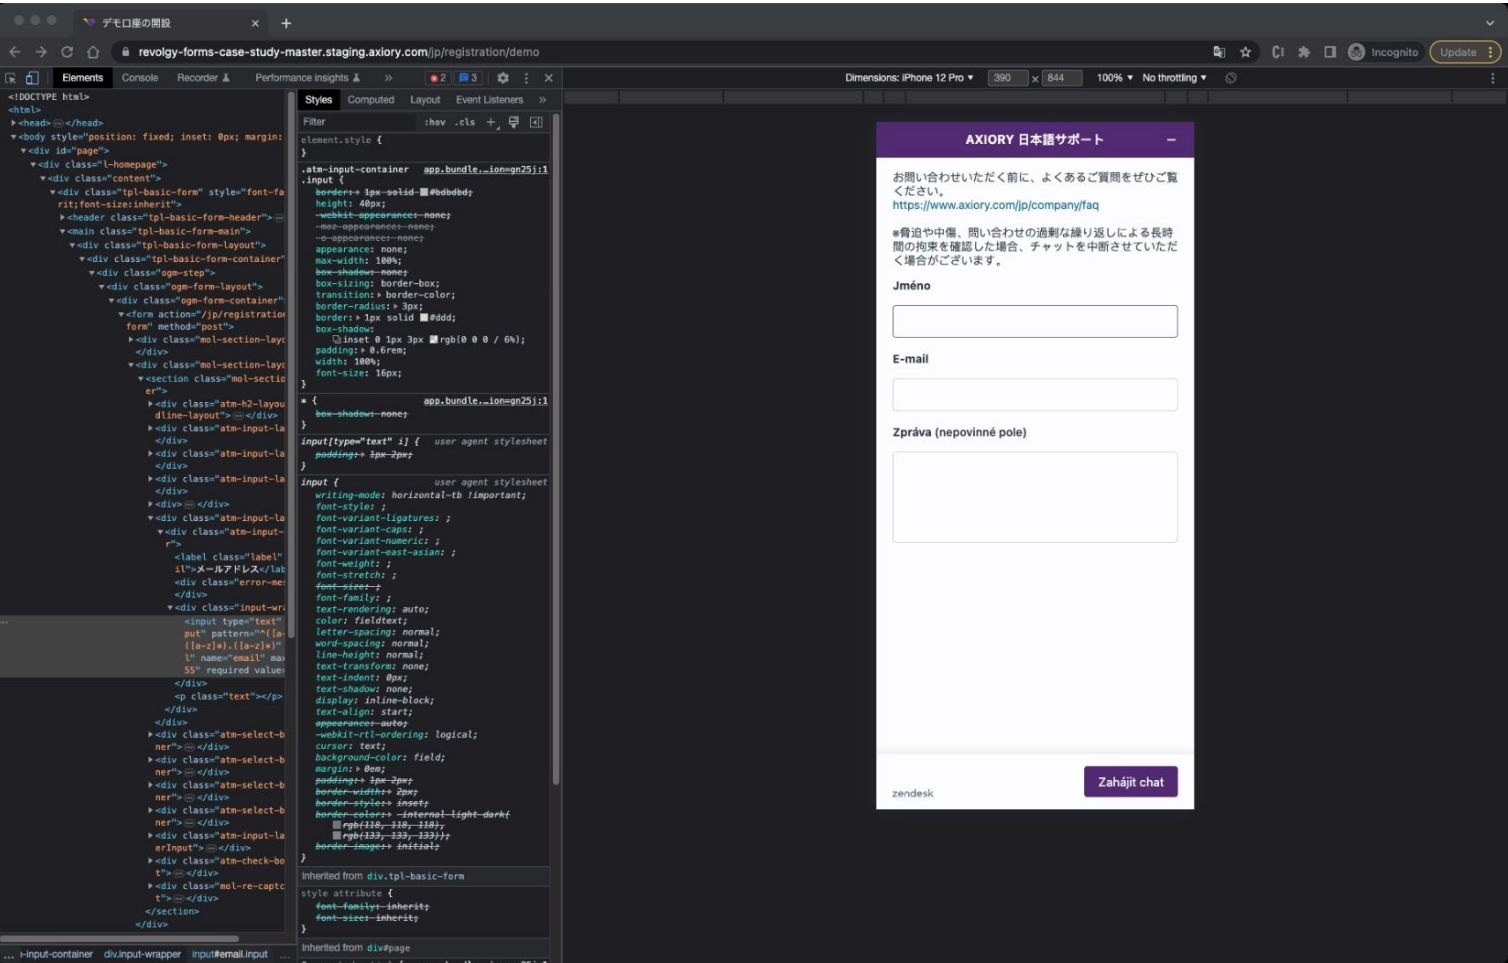

00:14:09 | Screenshot・Comment

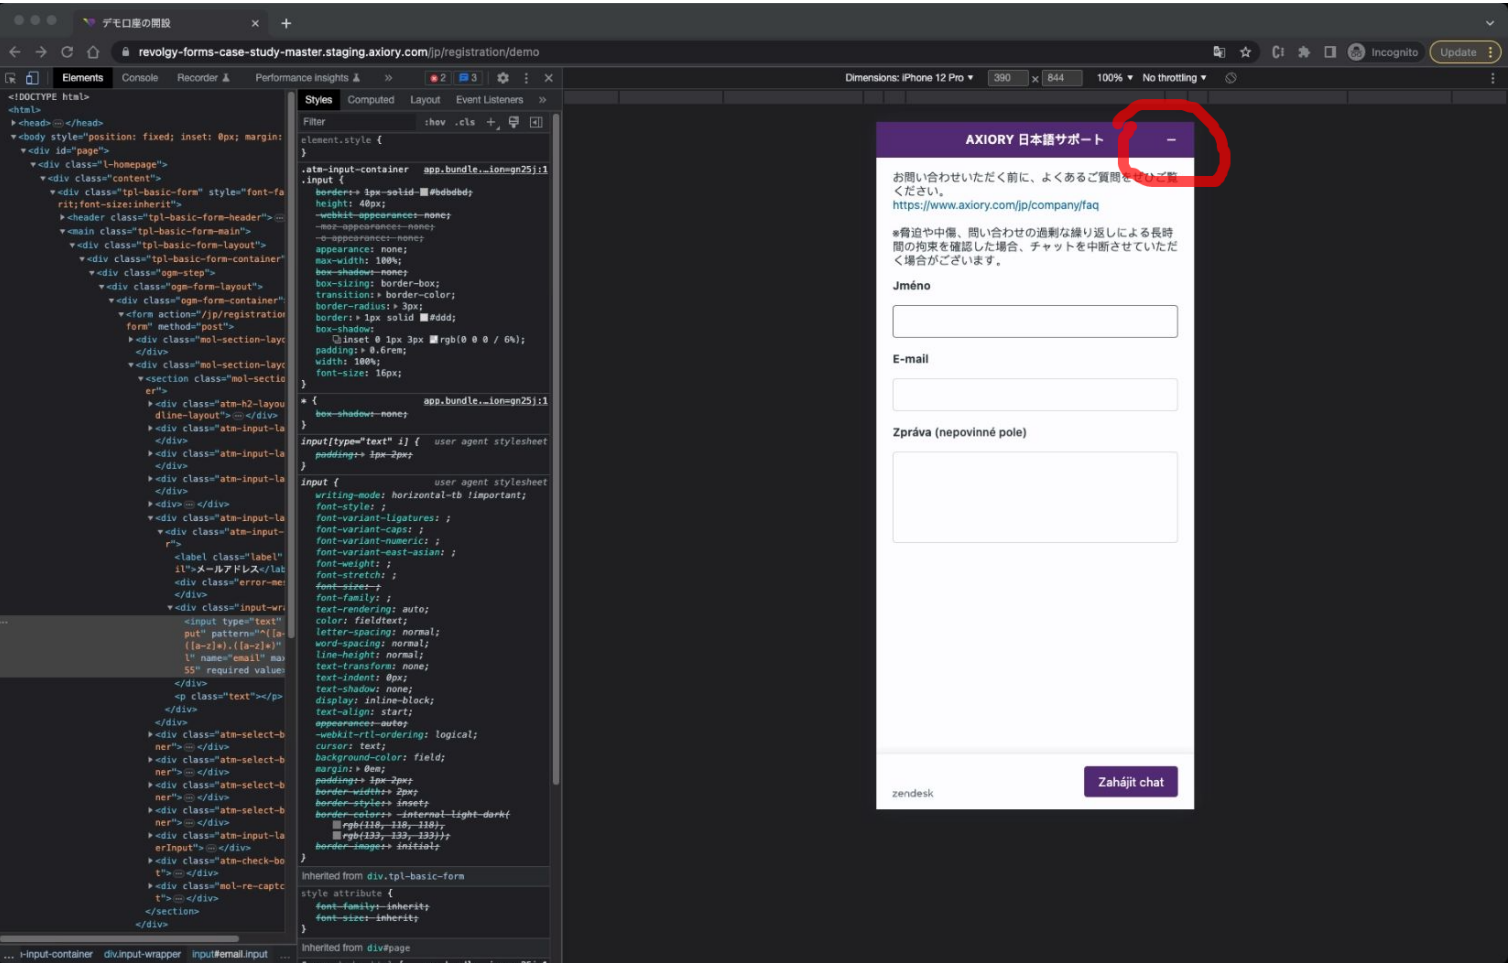

Let's try to open LiveChat

00:14:58 | Screenshot · Suggestion

Name and email could be already pre-filled, because I have them already written in the form on previsou page.

00:15:30 | Screenshot · Comment

Let's go back and check that I did not loose any previously written values.

00:15:58 | Note · Comment

Seems OK. The previous values are shown.

Session ended · Duration 00:16:14 11h40 | 06-03-2023
